DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

1. The following is a statement of reasons for the indication of allowable subject matter:

The present invention is directed to a method of forming an ad hoc hierarchical communication network for tracking articles. The invention further discloses a method of forming a class based ad-hoc hierarchical data network for asset tracking for each of the first plurality and second plurality of transceivers and communicating to an external network from each transceiver of each ad-hoc hierarchical class based network. The invention further discloses a method of broadcasting a communication at a first power level such that only a first group of transceivers receive the broadcast, with the communication including a command causing each of the first group of transceivers not to respond to subsequent broadcast; subsequent thereto, transmitting a communication broadcast at a second power level greater than the first power level so that the second group of transceivers receive the broadcast. The invention further discloses a dynamic distributed hierarchical database system for asset tracking.

Independent claims 1,2,28,29 identify the uniquely distinct feature as underlined above and therefore claims 1,2,28,29 and their dependent claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
